

The Next Generation in Power Pre-Stretch Film

'Load Containment' The secret to secure palletisation with stretchfilm

Saving a few pence here and there may not seem like a big deal... Until you look at the bigger picture.

Higher performance film means greater savings

Unlike some stretch films; our products are designed to be pushed to higher ranges of performance. At these maximum performance levels, you can take advantage of your wrapping equipments wrapping potential.

Take our stretch film challenge and take your operational efficiency to a new level

Finding extra savings has never been easier. We have a simple process that can save you money that you didn't even know was there. All you have to do is give us a call and we will visit you to assess your operational needs. We will then prepare a recommendation and return to do a performance/savings test with one of our system engineers. This will determine the possible annual savings.

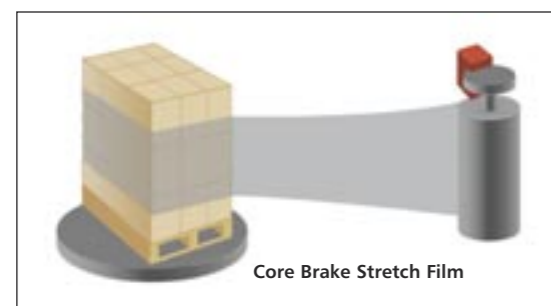

In addition Samuel Grant has the consistency and support personel to make sure you keep saving money over time. Your account manager will make periodic checks to help make sure you continue to save.

Stretch Film Selection ...

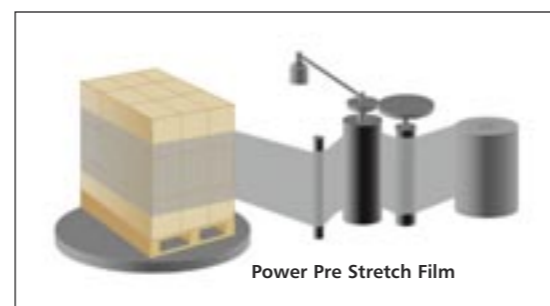

- Understand the end user's application
- Products wrapped
- Value of goods wrapped
- Equipment stretch % and speed
- Number of top / bottom / total wraps
- Load profile and weight
- Number of units wrapped
- Competitive product used

Considerations - Load Profiles

- Its shape is one of the factors you have to consider, the second one being its weight.

Put us to the test

What makes us so confident we can save you money? It's simple - we have the best, most consistent and technically advanced films available in the market today.

Contact your nearest Samuel Grant office to arrange a 'no obligation' consultation.

Polythene Stretch Film (hand rolls) - PPW ▼

High performance polythene film used to secure palletised goods. For best results apply with the use of a hand tool.

- A high tack blown film ensuring stable loads even in cold store conditions.

Polythene Stretch Film (hand rolls)

Thickness	Size	Pack Qty
15 micron	100mm x 150m	30 per box
20 micron	100mm x 300m	30 per box
15 micron	400mm x 300m	6 per box
17 micron	400mm x 300m	6 per box
20 micron	400mm x 300m	6 per box
20 micron	400mm x 300m Ext Core	6 per box
20 micron	500mm x 300m	6 per box
20 micron	500mm x 300m Blue	6 per box
25 micron	500mm x 250m Black	6 per box
34 micron	500mm x 175m	6 per box

Polythene Pre-Stretch (hand rolls) - PPW ▼

High performance pre-stretched polythene film used to secure palletised goods.

- Can help reduce waste legislation obligations by up to 50%.
- Easy to use - no back strain.
- Pre-stretched film wraps pallets tighter.
- Wraps faster because film does not neck down as with conventional film.

Polythene Pre-Stretch (hand rolls)

Size	Pack Qty
430mm x 600m	6 per box
400mm x 300m	12 per box
430mm x 600m Ext Core	palletised
500mm x 300m Ext Core	palletised

Stretch Film Mini Rolls - PPW

The PPW is a simple hand held stretch film system ideal for bundling and collating items together. Simply squeeze the handle for tension and cut-off.

Stretch Film Mini Rolls

Standard Machine Film - PPM-SGS ▼

SGS is a cast co-extruded LLDPE stretch film designed for applications on machines equipped with non-motorized (fixed gears) pre stretch brake systems and core, surface or friction brake systems.

- Maximum stretchability 100%.
- One sided cling, Non cling side super slippery.

Polythene Stretch Film

Standard Machine Film

Thickness	Width	Core Dia
15 micron	500mm	77mm
17 micron	500mm	77mm
20 micron	500mm	77mm
23 micron	500mm	77mm
30 micron	500mm	77mm
35 micron	500mm	77mm

Please request a sales representative visit to assess the appropriate stretch film for your machinery.

Power Pre-Stretch Machine Film - PPM-SGP ▼

SGP is a cast co-extruded LLDPE high quality stretch film for multiple applications. Designed for use on machines equipped with a variety of power stretch systems.

- Maximum stretchability 200%.
- One sided cling, Non cling side super slippery.

Power Pre-Stretch Machine Film

Thickness	Width	Core Dia
15 micron	500mm	77mm
17 micron	500mm	77mm
20 micron	500mm	77mm
23 micron	500mm	77mm
30 micron	500mm	77mm
35 micron	500mm	77mm

Samuel Grant can also provide hand stretch wrap dispensers - See page P46
