Samson Nano

**The next generation
in stretch film.**

introducing **Samson Nano**

The NEW high performance, superior strength and quality hand stretch film from the Samuel Grant Group.

A composite 33 layer hand film, using next generation extrusion technology and high grade resins for maximum strength and performance. Guaranteed 300 metres roll length on a 500mm wide roll as standard.

Introducing **Samson Nano**, wrapping more for less!

- Composite 33 layer superior strength and quality hand stretch film using next generation extrusion technology
- 500mm wide rolls for increased productivity and reduction in operator fatigue. Requiring 25% less revolutions walking around the pallet vs 400mm wide film
- 300metres per roll guaranteed – and we mean guaranteed which is why we put our name on it !
- Significant cost savings and consistently out performing conventional film in trials
- No loss of puncture resistance or load containment
- High clarity for barcode scanning
- High slip, so no pallet to pallet adhesion during transportation.

Samson Nano is boxed in rolls of 6, providing a guaranteed minimum of 1800 metres of superior strength and quality hand stretch film capable of stretching to 3600metres.

We are so confident that you will switch to Samson Nano, we are giving you a trial roll free of charge to get you underway – happy wrapping!

To place an order for Samson Nano simply contact your nearest Samuel Grant branch.
